

AISHWAR ANAND

Software Developer | .NET Core

[aishwar_anand@outlook.com] • [Noida], India • [LinkedIn](#)]

PROFESSIONAL SUMMARY

Software developer with 3+ years building and maintaining web applications in **C#, .NET Core, MVC, and SQL Server**. Strong on REST API development, third-party integrations, debugging, and performance tuning. Have led individual modules on live logistics projects, handled production issues directly, and worked closely with clients and QA teams to ship features and keep systems running.

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET 8, .NET Core, ASP.NET, ASP.NET MVC, JavaScript, jQuery, AJAX

Database: MS SQL Server (design, queries, optimization)

Tools & Concepts: Visual Studio, SSMS, REST/SOAP APIs, third-party API integration, Windows Services

EXPERIENCE

Colorplast — Software Developer

April 2026 – Present

Noida, Sector 65

- Maintain and extend Copal ERP, an in-house application used across the company for daily operations, keeping it stable and available for everyone who depends on it.
- Build new features in C# / .NET Core based on what business teams actually need, after discussing requirements with them directly.
- Design and tune the SQL Server databases behind the app, and fix data or performance problems as they come up.
- Handle bug fixes, testing, and day-to-day support across multiple Copal ERP modules.

Sagar Informatics Pvt. Ltd. — Software Developer

March 2022 – Nov 2025

Noida

- Turned business requirements into working features, mostly on logistics platforms, working with stakeholders to pin down what was needed.
- Built and maintained REST/SOAP API integrations with third-party services to extend what the applications could do.
- Worked with QA to test, debug, and fix issues, and folded user feedback back into the product.
- Provided ongoing support, maintenance, and performance improvements to keep systems reliable.

PROJECTS

Vichare LogiNext

C#, React, SQL, .NET Core

- Led a core module of this logistics platform — admin panel, customer portal, and mobile app — where customers book shipments and pay through an integrated wallet system.
- Built the secure REST APIs behind the React frontend and mobile apps, handled third-party integrations, and stayed on top of live production issues and new client requests.

Jones International Logistics

C#, JavaScript, SQL, .NET MVC

- Led the project — handled freight calculation, bill generation, and automated the daily client emails with packet booking details.
- Fixed production issues fast to keep operations running without interruptions.

TimeToTime Express

C#, JavaScript, SQL, .NET MVC

- Second lead on this logistics project, working on API integrations, freight calculation, and billing.
- Built a Windows Service that tracks parcel transit locations through API calls and sends clients automated daily booking updates, and resolved live production issues as they came up.

EDUCATION

Master of Computer Applications (MCA) - 67.36

2016 – 2018

[Swami Vivekanand Subharti University (DDE)], Meerut, U.P.

Bachelor of Computer Applications (BCA) - 67.92

2011 – 2014

[Swami Vivekanand Subharti University (DDE)], Meerut, U.P.
